3A

STATE OF NEW YORK
DEPARTMENT OF ENVIRONMENTAL CONSERVATION

3.23
F

-----X

In the Matter of the Development and Implementation of a Remedial Investigation and Feasibility Study for an Inactive Hazardous Waste Disposal Site, Under Article 17 and Article 27, Title 13, of the Environmental Conservation Law of the State of New York and of title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York Parts 371, 375 and 703 by,

CONSENT
ORDER

CASE NO.
R7-0201-87-08
(Willis Ave.)

ALLIED-SIGNAL INC.
Geddes (T)
Onondaga County, New York,

Respondent.

-----X

1. The New York State Department of Environmental Conservation (the Department) is responsible for the administration and enforcement of Article 17 and Article 27, Titles 7 and 13, of the Environmental Conservation Law of the State of New York (ECL) and of Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York (6NYCRR) Parts 371, 375 and 703.

2. Allied-Signal Inc. (Respondent is a corporation organized and existing under the laws of the State of Delaware and owns property (the Site) located in the Town of Geddes, Onondaga County, New York. The Site consists of (a) the area formerly occupied by a manufacturing facility known as the "Willis Avenue Plant"; (b) the area currently known as the "Petroleum Storage Facility", previously the location

01.04.90

of the "Benzol Plant"; and (c) associated areas containing benzene and chlorinated benzenes ('chloro-benzene hot-spots") on portions of the Respondent's main plant grounds. A description of the Site is attached to this Order as Appendix I.

3. Respondent has operated a manufacturing facility at the Willis Avenue location. The principal business of the facility was the production of chlorinated benzene products from benzene. The facility was damaged by fire. During that fire and/or during the prior period of facility operations, hazardous wastes entered the soil and groundwater at the plant location.

4. During the period from 1915 to 1970, a facility known as the "Benzol Plant" was located on the area now known as the "Petroleum Storage Area". Respondent operated the facility for the production of benzene, toluene, and xylene. In addition to the shipment of product to locations outside the area, pure benzene was piped to the Willis Avenue Plant for use in the production of chlorinated benzene products. During the period of facility operations, hazardous wastes entered the soil and groundwater at the plant location.

5. During the period of Willis Avenue plant operations, Respondent operated a pipe line which transported chlorobenzene waste water from the Willis Avenue Plant. The waste water line traversed portions of the Allied main plant grounds. During the period of operations,

(5) an evaluation of the ability of unconsolidated deposits, consolidated rock or bed rock and the groundwaters to attenuate potential pollutants such that the best usage of the groundwaters is maintained.

9. Pursuant to ECL §27-1313(3)(a), whenever the Commissioner of Environmental Conservation (the Commissioner) "finds that hazardous wastes at an inactive hazardous waste disposal site constitute a significant threat to the Environment, he may order the owner of such site and/or any person responsible for the disposal of hazardous wastes at such site (i) to develop an inactive hazardous waste disposal site remedial program, subject to the approval of the Department, at such site, and (ii) to implement such program within reasonable time limits specified in the order."

10. Reports the Respondent has submitted to the Department with regard to chemicals at the Willis Avenue Plant location include "Groundwater Conditions at the Former Willis Avenue Plant", April 1982, by Geraghty and Miller; "Hydrogeologic Investigation, Willis Avenue and Lakeshore Areas", March 1984, by Groundwater Technology; and "Shallow Aquifer Hydrogeologic Investigation, Willis Avenue and Lakeshore Area", December 1984, by Groundwater Technology. These reports indicate levels for benzene and dichlorobenzene above groundwater quality standards. They also indicate concentrations of toluene, xylene, naphthalene, and trichlorobenzene above guidance values for groundwater.

The Respondent has also submitted reports entitled "Water Purification Testing Report", December 1984, by Groundwater Technology; and "Technical Proposal for Shallow Aquifer Contaminant Interceptor and Water Treatment System", July 1985, by Groundwater Technology. These latter reports describe the results of a pilot test and set forth a preliminary proposal for recovery and treatment of the dissolved plume of hazardous organic chemicals in groundwater at Willis Avenue.

11. Reports the Respondent has submitted to the Department with regard to chemicals at the Petroleum Storage Area (formerly the location of the Benzol Plant) include "Petroleum Storage Facility, Groundwater Protection Program Report", by Groundwater Technology, dated October 1984, and "Petroleum Storage Facility Groundwater Protection Program Report", by Groundwater Technology, dated September 1985. These two reports indicate levels of benzene above groundwater quality standards. They also indicate concentrations of toluene, xylene, and naphthalene above guidance values for groundwater.

12. Reports the Respondent has submitted to the Department with regard to chemicals at other portions of the Main Plant grounds include "Site Evaluation, Area H," and "Site Evaluation, Area R," both by Blasland and Bouck Engineers, dated October 1987. These reports indicate levels above groundwater quality standards for benzene and chlorobenzene at monitoring well MW 111, and levels above

groundwater quality standards or concentrations above guidance values for benzene, chlorobenzene, and toluene at monitoring well R-5P. The reports attribute the likely source of these contaminants to leakage from the chlorobenzene waste water line formerly located in the vicinity. These two wells establish the approximate locations of chemical hot-spots, of currently unknown extent, which will be more precisely determined pursuant to this Order.

13. The Department and the Respondent acknowledge that the goals of this Order shall be that the Respondent shall develop and implement a remedial investigation and feasibility study for the inactive hazardous waste disposal site, subject to the approval of the Department, and implement such remedial investigation and feasibility study within the time limits specified, which remedial investigation shall be developed and implemented to identify, quantify and evaluate the threat to the public health or environment and which feasibility study shall be developed and implemented to identify corrective measures or alternatives to mitigate or eliminate the threat.

14. Definitions:

a. "Duplicate Samples" shall mean multiple samples, collected at the same time from exactly the same location, using the same sampling apparatus, collected into identical containers prepared identically, filled to the

same volume, and thereafter identically handled and preserved.

b. "Hazardous Wastes" shall mean hazardous wastes as defined in ECL §27-1301(1) and the regulations adopted pursuant thereto.

c. "Pollutant" means pollutant as defined in ECL §17-0105(17).

d. "Split Samples" shall mean whole samples divided into aliquots.

15. Respondent, having waived its right to a hearing herein as provided by law, and having consented to the issuance and entry of this Order, without any adjudication of law or fact, agrees to be bound by the terms hereof. Respondent's consent to and compliance with this Order does not constitute, and shall not be construed as, an admission of liability for any purpose or an admission by Respondent of law or fact or of the applicability of any law to conditions at the Site.

NOW, having considered this matter and being duly advised, IT IS ORDERED THAT:

I. Within ninety (90) days after the effective date of this Order, Respondent shall submit to the Department all data within its possession or control regarding environmental conditions on-Site and off-Site, to the extent that such data have not heretofore been provided to the

Department (the History). At a minimum this information shall include:

(a) A brief history and description of the Site, including the types, quantities, physical state and location of hazardous wastes including spills and the dates and methods of disposal and spillage of such wastes and the relationship of these wastes to other materials adjacent to or underlying the Site;

(b) A description of the results of all relevant previous investigations of the Site and of relevant investigations known by Respondent to have been conducted of areas in the immediate vicinity of the Site, including copies of all relevant topographic and property surveys and engineering studies of the Site;

(c) A historical inventory of all aerial photography available for the Site, including date of flight, area of coverage, scale of reprints, and present owner of photography.

II. Respondent shall make all the submittals set forth in Table 1 in accordance with the time frames set forth in Table 1. All submittals made by Respondent pursuant to this Order shall be subject to Departmental review. The Department shall act in good faith to comply with the time frames for review set forth in Table No. 1, but shall not be bound by these time frames.

Table No. 1

Submittals

Submittal	Consent Order Paragraph	Days after Receipt for Department Review	Days to Prepare and Submit Revision*
History	II	30 days	30 days
Work Plan	IV	45 days	45 days
RIR	V	75 days	45 days
Feasibility Study	VI	75 days	45 days

* Unless a longer period is agreed to by the parties in view of the Revision requested by the Department.

(a) If the Department approves a submittal, it shall provide written notice to Respondent and Respondent shall perform the specified work or continue with Respondent's obligations under the Order in accordance with the terms of the approval. Each approved submittal shall be made a part of this Order.

(b) If the Department disapproves a submittal, the Department shall provide written notification setting forth the basis of the Department's objections. The Department shall not unreasonably delay or withhold its approval of any submittal and in its review shall be guided by generally accepted scientific principles and practices. Within fifteen (15) days after receipt of the Department's written notification, Respondent shall notify the Department of any portions of the Department's notification with which it does not agree. If within the following fifteen (15) days (or such longer time as the parties may agree) the parties

cannot resolve their differences, the Department staff's position shall become binding unless the Respondent shall request that the dispute shall be settled in accordance with the procedures set forth in subparagraph (c):

(c) At the request of either party, based on a dispute concerning the terms of a submittal required under this Order, the Commissioner may appoint an Administrative Law Judge (ALJ) to settle the matter.

If the ALJ deems it necessary to convene a hearing, the taking of evidence shall be concluded as soon as practicable after the ALJ's appointment. In all proceedings hereunder:

(1) The parties shall be the Department and the Respondent.

(2) Written notice shall be provided to the other party by the party requesting resolution of the dispute.

(3) The Respondent shall have the burden of proving that the Department's determination is arbitrary and capricious.

(4) The ALJ shall have all powers conferred by 6NYCRR 622.11.

(5) All proceedings conducted hereunder shall be stenographically recorded. The Respondent shall arrange for an expedited stenographic transcript to be made within 10 working days after the conclusion of the proceeding, and for the original and two copies of the transcript to be delivered to the ALJ at the expense of the Respondent.

(6) The ALJ shall prepare within 45 working days after receipt of the transcript of the proceeding, a written summary of the documentation and testimony received during the proceeding, and a recommended decision. The summary and recommended decision shall be sent by certified mail, return receipt requested, and another copy by Express Mail or FAX to the Respondent and the Department staff.

(7) The ALJ's recommended decision shall become the final determination of the Commissioner unless, within 10 working days from receipt of the recommended decision, either the Respondent or the Department objects in writing. Any objections shall be submitted in writing to the ALJ with a copy sent by Express Mail, FAX, or hand-delivery to the other party, which shall serve and file in the same manner its response, if any, within 5 working days of receipt of the objections. Upon receipt of the objections and any response, the ALJ shall refer the matter to the Commissioner for final determination.

(8) The commencement of dispute resolution procedures hereunder shall stay the obligations of either party that are the subject of such dispute resolution procedures unless the Administrative Law Judge or Commissioner shall rule otherwise.

(9) The final determination by the Commissioner shall be made as soon as practicable after receipt by him of the recommended decision by the ALJ.

(10) With respect to the final determination of the Commissioner, the Respondent shall have those rights granted pursuant to Article 78 of the Civil Practice Law and Rules (CPLR) of New York. The period for petitioning thereunder shall be limited to forty five (45) days.

IV. (a) Within ninety (90) days of the effective date of this Order, Respondent shall submit to the Department a proposed work plan (the "Work Plan") for a Remedial Investigation and Feasibility Study with respect to the Site and its environs (the "RI/FS"). The proposed Work Plan shall address all of the elements set forth in, and shall provide for the performance of the RI/FS in compliance with CERCLA, 42 U.S.C. §9601 et seq., as amended; the National Contingency Plan ("NCP") then in effect, 40 CFR Part 300 and any subsequent amendments to the NCP; applicable EPA guidance documents relating to the performance of the RI/FS including the USEPA draft guidance document entitled "Guidance for Conducting Remedial Investigation and Feasibility Studies under CERCLA" dated October 1988 and any subsequent revisions thereto; and the New York State ECL, regulations and NYSDEC Technical and Administrative Guidance Memoranda and any subsequent amendments or revisions thereto.

(b) The Work Plan shall consist of a chronological description of the anticipated RI/FS activities together with an anticipated schedule for the performance of these activities.

(c) The Sampling and Analysis Plan shall include:

(i) a quality assurance project plan that describes the quality assurance and quality control protocols necessary to achieve the initial data quality objectives.

(ii) a field sampling plan that defines the sampling and data gathering methods in a manner consistent with the "Compendium of Superfund Field Operations Method" (EPA/540/P-87/001, OSWER Directive 9355.0-14, December 1987) as supplemented by the Department.

(d) A Health and Safety Plan for the protection of persons at and in the vicinity of the Site during the performance of the remedial investigation which shall be prepared in accordance with 29 C.F.R. §1910 by a certified health and safety professional.

(e) A Citizen Participation Plan which is prepared in a manner consistent with the Department's publication "New York State Inactive Hazardous Waste Site Citizen Participation Plan".

(f) The Work Plan for the RI/FS shall address contamination on Site and all environmental impacts caused by the disposal and existence of hazardous substances within the meaning of CERCLA 42 U.S.C §9601(14) and hazardous wastes within the meaning of ECL §27-1301(1).

(g) The Work Plan shall also describe how the information from studies and investigations previously submitted by the Respondent with respect to the Site will be

utilized, and how comments previously prepared by the Department with respect to these studies and investigations will be addressed. The scope of work shall specify a time frame no longer than 12 months in which Respondent shall complete its Remedial Investigation and submit a Remedial Investigation Report (the RIR) to the Department and shall provide for interim submittals to the Department of all data, assessments and evaluations generated by the RIR.

V. (a) Upon approval of the Work Plan, Respondent shall perform the Remedial Investigation and shall submit to the Department the RIR based upon its performance of the Remedial Investigation in accordance with the approved Work Plan. In accordance with the time schedule contained in the approved Work Plan, Respondent shall perform the Remedial Investigation and submit the milestone reports (as defined in the Work Plan) and the RIR. During the Remedial Investigation, Respondent's engineer shall have on-Site when work is going on a full-time representative who is qualified to inspect the work who shall be responsible for quality control and quality assurance . The RIR shall include all data generated and all other information obtained during the Remedial Investigation, provide all of the assessments and evaluations set forth in CERCLA, in the NCP then in effect, and in the guidance documents referred to above and identify any additional data that must be collected. The RIR shall include a certification by Respondent's consultant that all

activities that comprised the Remedial Investigation were performed in full accordance with the approved Work Plan.

(b) After receipt of the RIR, the Department shall determine if the Remedial Investigation was conducted and the RIR prepared in accordance with the Work Plan and this Order, and shall notify Respondent in writing of its approval or disapproval of the RIR. If the Department disapproves the RIR, the Respondent shall revise the report in accordance with the Department's comments subject to the provisions of paragraph III. After receipt of the revised RIR, the Department shall notify Respondent of its approval or disapproval of the revised RIR. If the Department disapproves the revised RIR, the Respondent shall be deemed to be in violation of this Order.

(c) The Department may require a modification and/or an amplification and expansion of the Remedial Investigation and RIR by Respondent if the Department as a result of reviewing data generated by the Remedial Investigation or as a result of reviewing any other data or facts determines that further work is necessary.

VI. Within such period as may be recommended in the RIR and approved by the Department, Respondent shall submit to the Department an acceptable feasibility study (the Feasibility Study) evaluating on-Site and, if required, off-Site remedial options to minimize, mitigate, or eliminate the current threat to the environment or public health. The Feasibility Study shall be prepared and

certified by an engineer licensed to practice by the State of New York who may be an employee of the Respondent or an individual or member of the firm which is authorized to offer engineering services in accordance with Article 145 of the New York State Education Law.

VII. (a) Upon receipt of an acceptable Feasibility Study, after intra and inter government review and a public comment period, the consultants retained for the studies and investigations called for by this Order shall be available for no less than one public informational meeting as scheduled by the Department with regard to the studies and investigations. The consultants shall be prepared to present their findings and recommendations and respond to questions in that public meeting or meetings.

(b) The cost of publication and other expenses required for the notification of the public and for the public meeting(s) including stenographic costs shall be borne by Respondent.

(c) After the close of the public comment period, the Department shall select a final remedial program for this site in a Record of Decision (ROD).

VIII. Upon completion of this process, the terms of this Order shall be completed. Actual remediation and/or remedial design, if appropriate, shall be addressed in a further Consent Order or order after hearing or in a civil action.

IX. The Department shall have the right to obtain "split samples" for the purpose of comparative analysis of all substances and materials sampled by Respondent pursuant to this Order.

X. Respondent shall provide notice to the Department of any excavating, drilling or sampling to be conducted pursuant to the terms of this Order at least five (5) working days in advance of such activities.

XI. Respondent shall obtain whatever permits, easements, rights-of-way, rights-of-entry, approvals or authorizations are necessary in order to perform the Remedial Investigation and all of Respondent's other obligations pursuant to this Order. If Respondent's good faith efforts are unsuccessful, the Department, upon notification by Respondent, shall exercise its authority under the ECL in an effort to assist Respondent to obtain necessary authorizations.

XII. Respondent shall permit any duly designated officer, employee, consultant, contractor or agent of the Department to enter, at reasonable times, upon the Site or areas in the vicinity of the Site which may be under the control of Respondent, and any areas necessary to gain access thereto, for inspection purposes and for the purpose of making or causing to be made such sampling and tests as the Department deems necessary, and for ascertaining Respondent's compliance with the provisions of this Order. If this Order continues in effect at such time when

Respondent no longer operates an office and no longer has contractors on site, Department agrees to give Respondent reasonable notice at an address designated by Respondent. Respondent shall have the right to obtain "split samples" of all substances and materials sampled by the Department.

XIII. Respondent shall retain a third-party professional consultant, contractor and/or laboratory acceptable to the Department to perform the technical, engineering and analytical obligations required by this Order.

XIV. Respondent shall not suffer any penalty under any of the terms of this Order, or be subject to any proceeding or actions for any remedy or relief if it cannot comply with any requirements hereof because of an act of God, war, riot, strike, labor dispute, or other condition as to which negligence or willful misconduct on the part of Respondent was not a proximate cause, provided however, that Respondent shall promptly notify the Department in writing when it obtains knowledge of any such condition and request an extension or modification of the terms of this Order.

XV. The failure of Respondent to comply with any term of this Order shall constitute a violation under this Order and under the ECL.

XVI. Nothing contained in this Order shall be construed as barring, diminishing, adjudicating or in any way affecting (1) any legal or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against anyone other than

Respondent, its directors, officers, employees, servants, agents, successors and assigns; (2) the Department's right to enforce at law or in equity the terms and conditions of this Order against Respondent, its directors, officers, employees, servants, agents, successors and assigns in the event that Respondent shall fail to satisfy any of the terms hereof; and (3) the Department's right to bring any action at law or in equity against Respondent, its directors, officers, employees, servants, agents, successors and assigns with respect to areas or resources that may have been or will be affected or contaminated as a result of the alleged release or migration of hazardous wastes and other substances at or from the Site including, but not limited to claims for the remediation of Onondaga Lake and its tributaries, appropriate remedial investigations and feasibility study of Onondaga Lake and its tributaries and claims for natural resources damages.

XVII. The terms of this Order shall not be construed to prohibit the Commissioner or his duly authorized representative from exercising any summary abatement powers, either at common law or as granted pursuant to statute or regulation.

XVIII. Respondent shall indemnify and hold the Department, the State of New York, and their representatives and employees harmless for all claims, suits, actions, damages and costs of every name and description arising out of or resulting from the fulfillment or attempted fulfillment

of this Order by Respondent, its directors, officers, employees, servants, agents, successors or assigns.

XIX. No change in this Order shall be made or become effective except as specifically set forth by a further written Order of the Department, being made either upon written application to the Department by the Respondent setting forth the grounds for the relief sought or upon the Department's own findings after an opportunity for the Respondent to be heard or pursuant to the summary abatement powers of the Department.

XX. Within thirty (30) days after the effective date of this Order, Respondent shall file a Declaration of Covenants and Restrictions with the Onondaga County Clerk's Office for the purpose of providing notice of this Order to all potential future purchasers of any portion of the Willis Ave. Plant site. A certified copy of said filing shall be provided to the Department.

XXI. In the event that Respondent proposes to convey the whole or any part of its ownership interest in the Site, Respondent shall, not less than sixty (60) days prior to the consummation of such proposed conveyance, notify the Department in writing of the identity of the transferee and of the nature and date of the proposed conveyance. In advance of such proposed conveyance, Respondent shall notify the transferee in writing, with a copy to the Department, of the applicability of this Order.

XXII. A. All communication required by this Order to be made between the Department and Respondent shall be made in writing and transmitted by United States Postal Service Return Receipt Requested, or hand delivered to the addresses listed below.

B. Communication to be made from Respondent to the Department shall be made as follows:

1. Two copies to the Division of Hazardous Waste Remediation, Room 212, 50 Wolf Road, Albany, New York 12233. Attn: Michael J. O'Toole, Jr., Director.

2. Two copies to the Division of Environmental Enforcement, Room 618, 50 Wolf Road, Albany, New York 12233. Attn: David Markell, Director.

3. Three copies to the NYS Department of Environmental Conservation, Region 7, 615 Erie Boulevard West, Syracuse, New York 13204-2400. Attn: Regional Director.

4. Two copies to the NYS Department of Health, Empire State Plaza, Corning Tower, Albany, New York 12237, Attn: Ronald Tramontano.

C. Communication to be made from the Department to Respondent shall be made as follows:

1. One copy to Allied-Signal Inc. Attn: Mark White, P.O. Box 6, Solvay, New York 13209.

2. One copy to Allied-Signal Inc. Attn: Director of Environmental Compliance, Columbia Road and Park Avenue, Morristown, New Jersey 07960.

3. One copy to Bond, Schoeneck & King, Attn: H. Dean Heberlig, Jr., One Lincoln Center, Syracuse, New York 13202.

D. The Department and Respondent respectively reserve the right to designate other or different addresses on written notice to the other.

XXIII. The terms of this Order shall be deemed to bind Respondent and the Department, their officers, directors, agents, servants, employees, successors and assigns.

XXIV. Nothing herein shall be construed to bind any entity not specifically bound by the terms of this Order.

XXV. The terms hereof shall constitute the complete and entire Order between Respondent and the Department concerning the Site. No terms, conditions, understandings or agreements purporting to modify or vary the terms hereof shall be binding unless made in accordance with the terms of this Order.

XXVI. No informal advice, guidance, suggestions or comments by the Department regarding reports, proposals, plans, specifications, schedules or any other writing submitted by Respondent shall be construed as relieving Respondent of its obligations to obtain such formal approvals as may be required by this Order.

XXVII. The effective date of this Order shall be five days after the Order is signed by the Commissioner or his designee and mailed to the Respondent at the address listed above.

DATED: Albany, New York

New York State Department of
Environmental Conservation

BY *Thomas Jorling*

TO: Bond, Schoeneck and King
One Lincoln Center
Syracuse, New York 13202
Attn: H. Dean Heberlig, Esq.

CONSENT BY RESPONDENT

Respondent, without any admission of law or fact,
hereby consents to the issuing and entering of this Order,
waives its right to a hearing herein as provided by law, and
agrees to be bound by the provisions, terms and conditions
contained in this Order.

JOSEPH ZAGRANICZNY
NOTARY PUBLIC, STATE OF NEW YORK
QUALIFIED IN ONOND. CO. NO. 408717
MY COMMISSION EXPIRES DECEMBER 31, 19 91

APPENDIX I

The Site is located within the Town of Geddes, Onondaga County, New York. The Site includes the former Willis Avenue plant location; an area known as the "Petroleum Storage Area", previously the location of the "Benzol Plant"; and hot spots of contaminated soil and groundwater associated with a wastewater line from the former Willis Avenue Plant.

The former Willis Avenue Plant is bounded by State Fair Boulevard on the northeast; Willis Avenue on the east; the Conrail Railroad tracks on the south; and the Allied Chemical Semet Tar Beds (Site Code 734008) on the northwest.

The Petroleum Storage Area is located southwesterly of the former Willis Avenue Plant. It is bounded on the northeast by the Conrail Railroad tracks; on the southeast by a railroad siding, on the opposite side of which are or were facilities known as the Ammonium Chloride Plant and the Sodium Nitrite Plant; and on the west by an area known as the soft coal storage area. The contamination hot spots associated with the former wastewater line are located in the vicinity of and presently are defined by the locations of wells MW-111 and R-5P on Figure A.

ALLIED-SIGNAL INC. (Willis Avenue Site)
Case No. R7-0201-87-08

ERRATA

This Order contains no paragraph III. The reference in paragraph V(b) to paragraph III should correctly be referred to paragraph II.
